

Partnership to Fight Infectious Disease

Tuesday, April 16

11am ET

[REGISTRATION LINK](#)

Join the Partnership to Fight Infectious Disease (PFID) for **Public Opinion Research & Perspectives on the Future of Vaccines** to discuss recently conducted public opinion research on voter perceptions and attitudes toward vaccines as well as insights from expert stakeholders on the state of vaccination and rebuilding trust in the wake of the COVID-19 pandemic.

Some key findings:

- **80% of respondents found that vaccines approved by the FDA are generally safe** along with **79% of respondents who agree that vaccines protect communities from dangerous outbreaks of diseases.**
- There is greater intensity around vaccinating children compared to adults with **88% of respondents saying their children often get vaccines that are recommended** for them by their doctor or other health care provider whereas **78% of respondents often get vaccines recommended for themselves** by their doctor or other health care provider.
- There is interest in new vaccines with **72% of respondents stating they would be likely to seriously consider getting a new vaccine in development** for Alzheimer's, HIV/AIDS, Parkinson's, Lyme, certain common types of cancers.

Panelists will include:

- Former Governor **Howard Dean** (Moderator)
- **David Mermin**, Partner, Lake Research Partners
- **Brian Neinaber**, Vice President, The Terrance Group
- **Dr. Melissa Briggs Hagen**, CDC Immunization Services Division
- **Dr. Angela Branche**, Associate Professor of Medicine, University of Rochester; Member, Infectious Diseases Society of America, Public Policy & Advocacy Committee
- **Robin Strongin**, Senior Director, Health Policy, National Consumers League
- **Dr. James Bigham**, MPH, FAAFP, American Academy of Family Physicians
